DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 45 – 74, drawn to method and system for displaying a product for order and accepting the order, classified in class 705, subclass 26.
- II. Claims 75 – 112, drawn to a method and system for obtaining information relative to design of a product, production and delivery, classified in class 705, subclass 8.

Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Group I has a different function regarding placing an order by a consumer for a product, which does not require incorporating a second user in the design, production and delivery of the product. Claim 1 for example, does not require a method and system for involving a second user in the design, production and delivery of a product to the consumer to impart patentable distinction to the method recited therein.

Art Unit: 3625

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
